Phuoc (Thomas) Nguyen

Software Engineer
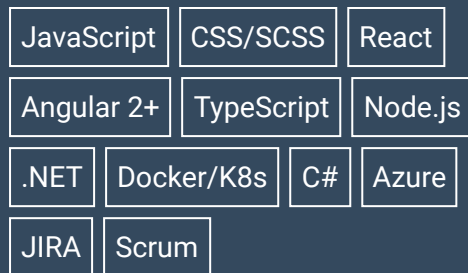

Born 1997 in Helsinki

About me

I am a full-stack software developer with hand-on experience in JavaScript related stacks and .NET development. On the frontend side I have been using HTML, CSS/SASS, React/Angular, and TypeScript. In addition, I am also familiar with Node.js, C# .NET as server-side languages, and exposed to RabbitMQ/MassTransit as communication tools between microservices. I have worked both with Agile and Continuous Integration/Deployment, using JIRA, Confluence, GIT, Bamboo, Octopus and Azure Portal. I have experience in container technologies, both Docker and Kubernetes.

Skills

JavaScript	CSS/SCSS	React
Angular 2+	TypeScript	Node.js
.NET	Docker/K8s	C#	Azure
JIRA	Scrum

💼 Experience

Software Engineer
Nord Pool
January 2019 - Present
["Maintain and develop trading platform auction based for electricity market & power exchange.", "Rewrite auction system's customer-facing application from scratch using Angular 8, TypeScript, RxJS, SCSS, Material Design and .NET Core.", "Develop multi-tenant theming API with SCSS, allow dynamic styling for user interfaces based on customers' config.", "Improve test coverage for auction system with test automation development in Node.js, Jasmine, Protractor.", "Utilize container technology (Docker, Kubernetes) to limit dependencies on existing Virtual Machines, enabling a seamless deployment pipeline", "Practice SAFe methodology as a solution to Scrum at enterprise level."]

Web Developer
Integrify
April 2018 - December 2018
["Participate in Integrify's bootcamp and develop several side-projects in React and Node.js.", "Build Integrify's internal Student Assessment Tool from front to back with React, Redux, SCSS, Node.js and Express. Design/develop authentication flow, landing page."]

🎓 Education

Bachelor of Engineering
2016 - Upcoming graduation 2020
Major in Software Engineering, Metropolia University of Applied Sciences.

High School Diploma
2012 - 2015
Computer Science Specialized Class, VNU-HCM High School for the Gifted.

<> Projects

Fetch Anime
React, TypeScript, SCSS, URQL, GraphQL, Netlify
["Progressive web application to track information about seasonal animes.", "Hobby project where I got to try out new technologies"]

Burger Order
React, Redux, Redux Saga, CSS Module, Firebase
["Burger Order application with custom Burger Animated CSS", "Practice state management pattern in React apps with Redux"]
