Phuoc (Thomas) Nguyen

Software Engineer
Helsinki

I am a full-stack software developer with hand-on experience in JavaScript related stacks and .NET development. On the frontend side I have been using HTML, CSS/SASS, React/Angular, and TypeScript. In addition, I am also familiar with Node.js, C# .NET as server-side languages, and exposed to RabbitMQ/MassTransit as communication tools between microservices. I have worked both with Agile and Continuous Integration/Deployment, using JIRA, Confluence, GIT, Bamboo, Octopus and Azure Portal. I have experience in container technologies, both Docker and Kubernetes.

✅ Skills

JavaScript	CSS/SCSS
React	Angular 2+
TypeScript	Node.js
.NET	Docker/K8s	C#
Azure	JIRA	Scrum

💼 Experience

Software Engineer
Nord Pool
January 2019 - Present
- Maintain and develop trading platform auction based for electricity market & power exchange.
- Rewrite auction system's customer-facing application from scratch using Angular 8, TypeScript, RxJS, SCSS, Material Design and .NET Core.
- Develop multi-tenant theming API with SCSS, allow dynamic styling for user interfaces based on customers' config.
- Improve test coverage for auction system with test automation development in Node.js, Jasmine, Protractor.
- Utilize container technology (Docker, Kubernetes) to limit dependencies on existing Virtual Machines, enabling a seamless deployment pipeline
- Practice SAFe methodology as a solution to Scrum at enterprise level.

Web Developer
Integrify
April 2018 - December 2018
- Participate in Integrify's bootcamp and develop several side-projects in React and Node.js.
- Build Integrify's internal Student Assessment Tool from front to back with React, Redux, SCSS, Node.js and Express. Design/develop authentication flow, landing page.

🎓 Education

Bachelor of Engineering
2016 - Upcoming graduation 2020
Major in Software Engineering, Metropolia University of Applied Sciences.

High School Diploma
2012 - 2015
Computer Science Specialized Class, VNU-HCM High School for the Gifted.

<> Projects

Fetch Anime
React, TypeScript, SCSS, URQL, GraphQL, Netlify
- Progressive web application to track information about seasonal animes.
- Hobby project where I got to try out new technologies

Burger Order
React, Redux, Redux Saga, CSS Module, Firebase
- Burger Order application with custom Burger Animated CSS
- Practice state management pattern in React apps with Redux
